

Queer Geeks

Upcoming Events:

"OUT AT IBM"

Eileen Kopp, Manager of IBM's DB2 user interface group, and a female colleague, will share experiences of what it is like being "Out at IBM". Also to be discussed are the challenges of having a baby and balancing family and work.

7:00pm May 3rd
Merril Baobob Lounge

"ERIC ALLMAN, KIRK MCKUSICK"

Eric Allman and his partner Kirk McKusick will be discussing their history and how queer issues have affected them while involved in development of two major internet technologies: Sendmail and BSD Unix.

5:00pm May 11th
Social Sciences 1
Room 110

The presentation will be in three sections, with a break:

1. Eric Allman: Taking an Open Source Project to Market: A Parable of Sendmail
2. Kirk McKusick: History of BSD Unix
3. The personal stories of Eric Allman and Kirk McKusick.

Eric Allman is the author of the Sendmail program. Sendmail serves as the foundation of Internet email. Kirk McKusick is a significant figure in the BSD world, having been responsible for the development and release of 4.3BSD and 4.4BSD.

Sponsored, in part, by IEEE
